

Braces,
home economics,
the jabs against
cervical cancer.

You only
fully appreciate
them when
you're older.

The vaccine against cervical cancer will help save hundreds of women's lives a year.

The vaccination programme is given as three injections.

Once your daughter has started the course, make sure she doesn't miss the others, as she won't be armed unless she has all three.

Arm her against cervical cancer.

For more information about the HPV vaccine visit www.nhs.uk/HPV or call the helpline on 0845 602 3303*
