Notes:

The table shows provisional data on the number of eligible girls and the percentage uptake of first, second and third dose vaccinations administered up to the end of April since the beginning of the programme, 1st September 2008. The data is broken down by England, Strategic Health Authority (SHA) and Primary Care Trust (PCT).

This information is supplied by each PCT and is submitted monthly using the Department of Health's ImmForm website. These data are subject to change; data from the monthly vaccine uptake collections should be considered provisional. The denominators for Cohort 1 are based on school roll data. The denominators for Cohort 2 are based on PCT population data. Therefore, the vaccine uptake rates should be regarded as indicative. Annual coverage data will be collected in September 2009. It is the annual survey that will provide the formal uptake figures and will be subsequently published as final data.
